

SAPC-5600
Copy 6 of 7

24 April 1956

Joe -

The other customer (other than ourselves) has passed on to us the following specifications and directions with respect to their portion of the material.

1. Nine and one-half inch wide film should be cut in 490 foot lengths in standard cans for storage. Packaging only of a durability to stand up under a one-time shipment is required;

2. Five inch material to be cut in 100 foot spools in standard storage cans, same packaging as above;

3. Materials referred to above are to be addressed to:

At a later date some material for the Air Force may be sent to another place with a different address. At that time you will be notified.

George
